

U.S. Short-Term High Yield Bond Fund

OBJECTIVES AND PROCESS

- Seeks total return consisting of a high level of current income and capital appreciation.
- Invests at least two-thirds of its assets in corporate debt securities that are below investment grade or, if unrated, of comparable quality, principally invested in below-investment grade-debt rated BB or B or equivalent.
- Uses bottom-up fundamental credit analysis to generate new ideas and identify individual securities with good income and/or capital appreciation prospects.
- The fund may invest:
 - up to 25% of its assets in US\$-denominated debt securities of non-US issuers
 - up to 20% of its assets in asset-backed securities
 - using futures/derivatives for hedging, efficient portfolio management or for investment purposes

KEY RISKS

Debt securities risk: debt securities are subject to credit risk and interest rate risk and are affected by an issuer's ability to make interest payments or repay principal when due. **High yield securities risk:** high yield securities are rated below investment grade, are predominantly speculative, have a much greater risk of default and may be more volatile than higher-rated securities of similar maturity. **Geographic concentration risk:** investments concentrated in specific geographic regions and markets may be subject to greater volatility due to economic downturns and other factors affecting the specific geographic regions. **Asset-backed securities risk:** asset-backed securities may be more sensitive to changes in interest rates and may exhibit added volatility, known as extension risk, and are subject to prepayment risk.
