

USD Investment Grade Credit Fund

OBJECTIVES AND PROCESS

- Seeks total return, maximizing investment income whilst preserving capital.
- Invests at least two-thirds of its assets in US\$-denominated credit debt securities of investment grade (or equivalent) at the time of purchase.
- Invests at least 5% of its assets in Green, Sustainable, Sustainable-linked and Social Bonds.
- Focuses on bottom-up credit research seeking to balance income whilst aiming for a competitive yield to drive total returns.
- Favours companies with strong or improving ESG positions and incorporates into its rigorous fundamental analysis.
- Uses a negative screen to exclude securities issued by companies based on their exposure to ESG risks.
- The fund may invest:
 - one-third of fund assets in debt securities rated below investment grade and non US\$-denominated debt securities
 - up to 20% of fund assets in asset-backed securities
 - futures/derivatives for hedging, efficient portfolio management or for investment purposes

KEY RISKS

Debt securities risk: debt securities are subject to credit risk and interest rate risk and are affected by an issuer’s ability to make interest payments or repay principal when due.

Asset-backed securities risk: asset-backed securities may be more sensitive to changes in interest rates and may exhibit added volatility, known as extension risk, and are subject to prepayment risk. **High yield securities risk:** high yield securities are rated below investment grade, are predominantly speculative, have a much greater risk of default and may be more volatile than higher-rated securities of similar maturity.

ESG risk: applying an ESG screen for security selection may result in lost opportunity in a security or industry resulting in possible underperformance relative to peers, ESG screens are dependent on third party data and errors in the data may result in the incorrect inclusion or exclusion of a security.
